

Solutions Brief | Insurance

Speed up document processing and save on costs

For insurance brokers and sales reps, there's a ton of paper to process and human errors abound. Gathering data quickly and accurately is essential to maintaining fast customer-response times, delivering quotes, and keeping clients happy.

ScanSnap scanners and state-of-the-art imaging software are designed to capture documents in the simplest way with radical precision, and to convert those documents into usable data—so no information is lost. When less time is spent processing paperwork and documents are safely digitized and organized, costs associated with labor, storage, and warehousing of documents are lower.

ScanSnap

Speed up document processing and save on costs

Modernize and simplify your document management with ScanSnap

Whether you work from home or out of an office, investing in technology doesn't have to be daunting. The ScanSnap all-in-one document-management system is simple to set up—there's no need for IT. Using high-quality Fujitsu imaging solutions built to last for years, office managers, insurance agents, and claims adjusters are able to:

- Eliminate processes that were once manual and prone to human error
- Improve the speed of document processing for client onboarding, claims approvals, insurance quotes, and more
- Improve the accuracy of client records to reduce duplication, misfiling, and loss
- Access data and claims quickly for timely decision-making
- Search and find records upon request to meet compliance
- Produce exceptionally clean images—better than the original
- Remove physical storage of documents, making office space available for other purposes

Save time, costs, and space by scanning:

- Accident photos
- Claims reports
- Client applications
- Insurance price quotes
- Proof of ownership documents (automobile, home, boat)
- Repair estimates

Take the perfect scan, every time

Fujitsu provides accelerated claims processing through easy-to-use and affordable digital automation technology. To meet the unique needs of your insurance business, we recommend the following models—just right for scanning at reception desks and broker offices, in file rooms or during on-site visits.
